Nairobi, Kenya | emmanuelmakobiero@gmail.com | 0711 617 528 | linkedin.com/in/emmanuel-makori-obiero-3125203b5 | github.com/Emmanuel-Makori-Obiero

Full-stack software engineer focused on AI-powered, offline-first software for transport, agriculture, and education. Builds backend systems, integrates AI/RAG, and ships usable software for people without reliable connectivity — working daily in Node.js, React, and MongoDB.

SKILLS

Core: Node.js, React, Express, MongoDB, Supabase

AI / Data: RAG / LLMs, Power BI

Connectivity: USSD & IVR, offline-first architecture

EXPERIENCE

Freelance Web Developer — Writers Admin

2026

- Delivered a high-traffic business website on Wix with custom branding and optimized navigation.
- Held 99.9% uptime and streamlined the conversion flow, driving a measurable increase in client inquiries.

SELECTED PROJECTS

Matu — Matatu Booking & Fleet Management PWA

matu-gamma.vercel.app

- Lets passengers pick a route, book a seat, pay by M-Pesa, and track vehicles live; gives drivers and sacco admins dashboards to manage trips, fleets, and commissions.

React 19 + TanStack Start, Supabase, Mapbox/Leaflet, M-Pesa Daraja API, PWA

Agriion — Voice/USSD Agronomy Assistant

github.com/Emmanuel-Makori-Obiero/AGRION

- Delivers real agronomy advice over USSD and voice calls for farmers without smartphones, pulling from a knowledge graph of IITA crop guides and NiMet weather data.

FastAPI, Neo4j, LangGraph, Africa's Talking, ElevenLabs, ChromaDB

Sauti ya Shamba — "The Voice of the Farm"

sautiyashamba.vercel.app

- Delivers verified crop, price, and weather guidance over voice, USSD, and SMS in Swahili, with every figure sourced and citable.

Voice / USSD / SMS, Swahili, market price data, sourced content

Jarvis — Cross-Platform Voice AI Assistant

github.com/Emmanuel-Makori-Obiero/Jarvis

- Built a voice-driven assistant spanning desktop, mobile, and VS Code that edits files, runs research, and remembers context between sessions.

React + TypeScript, Electron, Capacitor, Gemini API, Supabase

Eduvance — AI-Gamified Study Platform

eduvancereal.base44.app

- Turns uploaded class notes into games and anime-style lessons, plus shared note-taking; optimized API routes cut data retrieval latency by 25%.

Base44, AI content generation, gamified learning

Dhamana POS — Offline Point of Sale

github.com/Emmanuel-Makori-Obiero/POS

- Fully offline POS for a single Windows machine: barcode checkout, profit tracking, PDF reports, and 7-day sales forecasting from local history alone; cut manual reconciliation time by 40%.

Offline-first, local API, barcode/QR, sales forecasting, PDF reporting

Crochet Store — E-Commerce Storefront

e-commerce-store-ten-hazel.vercel.app

- Built a storefront for an independent crochet business with a seller dashboard for listings in KSh and a buyer-side cart and checkout.

HTML/CSS/JS, buyer/seller roles, cart & checkout

HACKATHONS & ACHIEVEMENTS

Africa's Talking Hackathon — Aug 2026 Participant

Build with Gemma 4 Hackathon — Jul 2026 Team, 2nd Runners-Up

LOOP Hackathon — Aug 2026 Team Winner, Best in Customer Impact & Satisfaction
